New York Construction's annual Top Contractor survey aims to identify the general contractors and construction managers that are most active in the New York, New Jersey, and Connecticut markets. We mailed survey forms to subscribers, members of contracting associations, companies that participated in our survey in prior years, and contacts gathered from other reporting and data resources. In addition, we also reached out to these same firms, urging them to complete their surveys online, as the majority of them did. We compiled all information reported by responding companies on the official survey forms and the data was tabulated and compiled by McGraw-Hill Construction Research and Analytics. All respondents were required to certify that the data they submitted was accurate and valid. From those results, we are highlighting the companies in the region that are handling the most construction work in each category of comparison. For more information on our process or to participate in future surveys, please write to jack\_buehrer@mcgraw-hill.com or visit our Web site at <http://newyork.construction.com>.
