How the survey was conducted:

New York Construction's Top General Contractor and Construction Manager survey aims to identify the general contractors and construction managers that are most active in the New York, New Jersey, and Connecticut markets. We mailed survey forms to subscribers, members of contracting associations, companies that participated in our survey in prior years, and contacts gathered from other reporting and data resources. We made follow-up calls to dozens of regional companies to encourage their participation. We then compiled all information reported by responding companies on the official survey forms and tabulated that data. All respondents were required to certify that the data they submitted was accurate and valid. From those results, we are highlighting the companies in the region that are handling the most construction work in each category of comparison. For more information on our process or to participate in future surveys, please write to tom_stabile@mcgraw-hill.com or visit our Web site at <http://newyork.construction.com>.
